SUMMARY

Backend engineer with 5+ years building secure microservices for retail, mobile, and corporate banking platforms serving hundreds of corporate clients at FIS Global / Cognizant (client: First Citizens Bank). Owns services end to end — API design, event-driven architecture on Kafka, authentication and payment security, and production support in regulated on-premise banking environments. Promoted to Senior Software Engineer at FIS Global before a client-driven rebadge to Cognizant; now leading backend API architecture for a next-generation banking platform.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Python, JavaScript, Spring Boot, Spring Security, Spring Data JPA, Spring AI, LangChain4j, gRPC, ReactJS
- **Architecture & Data:** Microservices, REST APIs, event-driven design, PostgreSQL, Redis, MinIO, Apache Kafka, NATS JetStream
- **Security:** JWT, JWE, JWS, OAuth2, TOTP / MFA, maker-checker controls, PCI-DSS & SOX compliance
- **Cloud & DevOps:** Docker, Kubernetes, Jenkins, AWS (EC2, S3, ELB, IAM, RDS, Elastic Beanstalk), Git, Agile / Scrum
- **Observability & Real-Time:** ELK Stack, Prometheus, Grafana, Swagger / OpenAPI, WebRTC, WebSockets

EXPERIENCE

Cognizant Technology Solutions (rebadged from FIS Global)

Bengaluru, India

Associate Software Engineer | Client: First Citizens Bank

Apr 2026 – Present

- Leading backend API architecture for a next-generation banking platform using Java 21, Spring Boot 3.5, and Apache Kafka within a 25+ engineer delivery team; mentoring 4 junior engineers on clean code and CI/CD standards.
- Owning API design and delivery for corporate banking services on the same platform and team carried over from FIS Global.

FIS Global

Bengaluru, India

Software Engineer → Senior Software Engineer | Client: First Citizens Bank

Jul 2021 – Apr 2026

- Designed, built, and maintained Spring Boot microservices across a 30+ service estate powering Retail Online Banking, Mobile Banking, and Corporate Online Banking for hundreds of corporate clients — delivering three major corporate banking modules end to end.
- Implemented a maker-checker authorization framework in Corporate Online Banking, enforcing dual-approval controls on financial transactions to meet compliance and audit requirements.
- Delivered Card on File — credit card tokenization for Mastercard and Visa — plus virtual card services, and implemented JWT/JWE/JWS token security across banking APIs.
- Built an RFC 6238-compliant TOTP authentication system (AES-256-GCM secret storage, QR-code enrollment, Redis-backed replay prevention) and push-notification-based approval letting customers authorize transactions and logins from their registered device.
- Engineered Video KYC onboarding using WebRTC and WebSockets for real-time remote customer verification; shipped WhatsApp banking and contributed to Montran-based payment processing workflows.
- Built conversational AI integration APIs and LLM-powered banking chatbots for automated query handling, covering account detail retrieval and identity validation ahead of password-change flows.
- Optimized API response times through Redis caching and PostgreSQL query tuning with Spring Data JPA, sustaining throughput under high-load banking traffic.
- Led end-to-end ELK Stack + Kafka rollout for centralized logging and real-time monitoring, giving the team searchable cross-service traces and shortening production triage; integrated Swagger for API documentation.
- Automated CI/CD pipelines with Jenkins to shorten release cycles; diagnosed complex production issues on on-prem deployments and coordinated SIT, UAT, and production cycles with client stakeholders.

Aniworks

Bengaluru, India

Software Development Intern

Jul 2020 – Aug 2020

- Built hands-on experience across web development, artificial intelligence, and machine learning through team projects and technical presentations.

EDUCATION & ACCOMPLISHMENTS

- **B.E. in Computer Science and Engineering** — Sri Siddhartha Institute of Technology, Tumakuru Jul 2017 – Jul 2021
- **Above and Beyond Individual Award** — FIS Global (Q1 2024), for outstanding performance on critical project delivery.
